Millsite Reservoir & State Park

Millsite State Park is a lovely facility well maintained by the state; however, a bad condition exists: the brick building is bathrooms with field that drains into our local drinking water. You can see the height of the water in relation to the bathrooms.

This is a beautiful campground, boat ramp, good fishing, boating and other water sports.

The reservoir provides water and recreation for the town and surrounding areas; well taken care of, our small fees are well worth it.
